Drafty

A smart Wiki For Data

- **design choices we have made**

- design choices we are considering

- design choices we envision for the future

Write our own implementation for Drafty sheets

There are many useful Javascript Data Table Libraries, why to reinvent the wheel ⚙?

- **Server Side Rendering**

- **No plugin**

- **Represent tabular data as HTML table element**

Write our own implementation for Drafty sheets

HTML & CSS magic 🪄 we used:

- **Use <col> element to resize an entire column**

- **Use table-layout: fixed**

- **Use box shadows to imitate multiple shadows**

Reduce the number of popups

Reduce the number of popups

Write our own implementation for Drafty sheets

We want as few popups ▬ as possible!

- **Using more routes**

- **Put it more in-place**

Improve sheet actions

More similar to a standard spreadsheet ⊞

- **Row Edit vs Cell Edit**

- **Improved copy & paste**

- **Right click for a dropdown of actions**

- design choices we are considering

- **design choices we envision for the future**

What's for future?

- **Allow programmatic injections**

- **Generating data-baits and spread baits across social platform**

- **More in-platform analysis of sheet data**
